

## INSERTABLE DEVICE AND SYSTEM FOR MINIMAL ACCESS PROCEDURE

### Abstract of the Disclosure

**[0053]** The present invention provides a system and single or multi-functional  
5 element device that can be inserted and temporarily placed or implanted into a structure  
having a lumen or hollow space, such as a subject's abdominal cavity to provide therewith  
access to the site of interest in connection with minimally invasive surgical procedures. The  
insertable device may be configured such that the functional elements have various degrees  
of freedom of movement with respect to orienting the functional elements or elements to  
10 provide access to the site from multiple and different orientations/perspectives as the  
procedure dictates, e.g., to provide multiple selectable views of the site, and may provide a  
stereoscopic view of the site of interest.
